EDUCATION

Singapore University of Technology and Design (SUTD)

Sep 22 to Present

- Bachelor of Engineering (Engineering Systems and Design), Honours
- Minor in Sustainability by Design
- GPA 3.83/5.00
- UG ASEAN Scholarship Holder – Awarded to top regional students for academic and leadership excellence
- Date of graduate: May 2026

WORK EXPERIENCE

TÜV SÜD PSB

May 25 to Dec 25

People Department, Data Analytics Intern

- Collaborated with stakeholders across 6 ASEAN countries and 5 divisions to deliver workforce analytics on attrition, hiring, and manpower planning for regional decision-making.
- Designed and built a Power BI dashboard for the Head of HR reducing reporting time from hours to minutes; subsequently was adopted by 4 of 5 People Business Partners for monthly reviews with division leadership.
- Created 2 Excel recruitment dashboards for internship and full-time hiring, enabling monthly tracking of fill rates, time-to-fill, and recruitment progress for discussions with HR leadership.
- Completed 30+ ad hoc analytics engagements across HR and Finance, including regulatory cost simulations, compensation and benefits analysis, and insurance-related reporting.
- Consolidated and communicated ASEAN People Voice Survey findings across 6 countries and 5 divisions, generating insights used in senior leadership discussions on talent and retention.

AvePoint Singapore

Aug 24 to Jan 25

Client Services Department, Business Analyst Intern

- Drove a large-scale regulatory transformation project across 4 of 5 sprint cycles, contributing to requirements gathering, functional design, UAT planning, and client communication.
- Gathered business requirements through 16+ workshops with senior stakeholders from the Gambling Regulatory Authority of Singapore and GovTech, capturing regulatory needs, business processes, and system constraints.
- Co-authored 4 Functional Specification (FS) documents, translating business requirements into detailed workflows, business rules, and edge cases for development and QA teams.
- Took ownership of the Archival module, defining its functional requirements, workflows, and design specifications, and showcasing progress during sprint demos.

ACADEMIC PROJECTS

Schlumberger (SLB) x SUTD

Jan 24 to Apr 24

Demand Forecasting Project, Lead Data Analyst

- Classified 19,536 oilfield products/SKUs into 83 product families, while tracking unknown categories to improve data transparency and quality.
- Established data pipelines using Excel, SQL and Python for regional demand forecasting and planning.
- Evaluated three forecasting models, achieving 75% back-testing accuracy and guiding inventory and procurement decisions.
- Delivered insights through interactive Power BI dashboards and stakeholder presentations, improving data visibility for non-technical managers.

CO-CURRICULAR ACTIVITIES

SUTD Badminton Club

Apr 23 to Apr 24

Vice President, Competitive Team

- Managed club operations and budget for 30+ members, and organized tournaments to strengthen cross-year collaboration.
- Represented SUTD in SUNIG competitions from 2023 to 2025, demonstrating sustained commitment beyond leadership tenure.
